Come See AxxonSoft at SecurExpo East Africa 2023

Explore our intelligent security solutions with impressive integration and customization capacity.

AxxonSoft welcomes you to visit our stand A6 at SecurExpo East Africa 2023 in Nairobi, Kenya, 7–9 March. We will show our proven solutions and new features, focusing on AI, integration, and cloud.

At our booth, you will see:

- [Axxon One](#) — intelligent, limitlessly scalable VMS that supports cloud, on-premises, and hybrid deployments and offers a set of enterprise-level functionalities.
- [Axxon VSaaS Datacenter](#) — a software platform for building cloud-based, private and public surveillance solutions.
- [Axxon PSIM](#) — a physical security information management system with an impressive list of integrations and advanced automation capabilities.
- [AI video analytics](#) — human/vehicle detection, fire and smoke recognition, behavior analytics (posture identification), and custom-trained neural networks for specific tasks.

AxxonSoft is passionate about helping you form an efficient, safe, and data-driven organization where all elements of security infrastructure speak one language of data. Connect with us and learn more about setting up proactive surveillance to make more informed and accurate decisions in a timely manner.

We look forward to seeing you at stand A6, Sarit Center, Nairobi, Kenya, 7–9 March.
