

» About Us

Lady Askari is a security risk management company serving a diverse range of organizations with East African interests, from non-profits to multinational corporations. We specialize in security risk management, information services, protective services, crisis management, cybersecurity, and beyond.

» Why Women?

We all have strong women in our lives who prove that females are more than capable of protecting our communities – they are our Lady Askaris. Women have some advantages over men when it comes to security services including being able to easily blend into environments, providing a more comfortable security service as close protection officers for other women and children as well as heightened observation skills. Women deserve a space in the security industry, and we are creating it.

Vision

To provide our customers with innovative security solutions and a high standard of service, ALL while redefining the role of women in the security industry.

Mission

To change the perception of Women in the Security Industry, One Lady at a Time.

Values

RESPECT + CAPACITY
BUILDING + INNOVATION +
COMMUNITY + TRUST =
LADY ASKARI

- South Africa
- South Sudan
- Sudan
- Tanzania
- Uganda

Protective Services

Our secure journey management services take everything into account including provision of a trustworthy driver, pre-trip planning, trip risk assessments, training, security briefings, and tracking and monitoring while your team is deployed. We can also provide executive protection options from a full security detail to a single officer.

Training

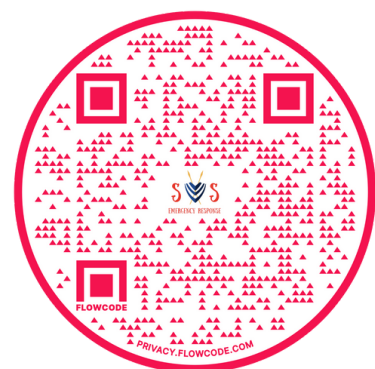

Through the Lady Askari Training Academy we provide a variety of security-based trainings tailored to your needs. Our E-learning platform is mobile friendly so your team can participate in training anytime, anywhere. For learners that need more interactive sessions, we offer virtual and in-person trainings. We also create hybrid programs to ensure we meet the learning needs of your staff. Some trainings we offer include:

- Security Awareness Training
- Hostile Environment Awareness training (HEAT)
- Conflict Management & De-escalation
- Self-Defense (private women classes with a women instructor available)
- Risk Management (basic and advanced)
- Cyber Security Awareness (for employees)
- Election Preparedness Training

Ita Help

In Kenya, emergency response services can be slow and often complicated to access. Although people have access to static panic buttons within their homes and offices, these panic buttons do not work while on the move. That's why Lady Askari partnered with the tech company Aura to create Ita Help, a mobile app that gives you access to rapid emergency response at the touch of a button.

Enterprise Risk Management

Organizations are facing ever evolving risks and managing these risks is becoming increasingly challenging. If you have an existing security team or your organization is looking to develop a security structure, we develop bespoke security solutions that meet the unique needs of each of our clients with the goal of building security into your company culture in an effort to keep people, property and assets safe.

Other Services

- Control Room Operations
- Weighbridge Operations
- Loss Prevention
- CCTV/ Electric Fence Installation & Maintenance
