- Wave template on Card not supported
- Functions as a Wave template enrolment device with Verif Dongle (C864510 or C864401)

Product details

The integration between Gallagher and IDEMIA delivers a fully integrated biometric access control solution without requiring external plugin synchronization or enrolment utilities. The MorphoWave XP offers seamless contactless biometric enrolment with template management performed within Gallagher Command Centre. Command Centre can be used to update a user's biometric credentials, schedule, and access. Only the relevant biometric templates are sent to each reader, saving database space and cost. Advanced encryption functionality includes multi-factor authentication, template privacy management, anti-passback, duress biometrics, dual authorization, zone counting, interlocking doors and controlled challenge is also supported.
