

FLEET MANAGEMENT

- 2G trackers: [ADM007BLE](#), [ADM333](#)
- LTE tracker: [ADM500](#)
- Eco driving
- Fuel management
- Ignition control
- Wireless and wired sensors
(temperature, fuel level, inclination, RFID, water level, ect.)

DRIVER & TRUCKS IDENTIFICATION

Drivers time and attendance recording
and registration of towing equipment engine hours

RFID-tag [ADM21](#)

RFID-reader [ADM20](#)

BLE-tag [ADM34](#)

MOTORBIKES MONITORING

For bike monitoring use [ADM007BLE](#) the smallest
tracker with sleep mode

- Small size - variability of installation places
- Energy-efficient (economical) operating mode
- Configuration via SMS, with PC, through a server and via a smartphone
- Ignition monitoring and theft prevention options

TRANSPORT CONDITIONS CONTROL

Wireless high-precision temperature, humidity and light sensors provide real-time control of the cargo

- High precision measurement of temperature and illumination
- Magnetic field detection
- Tight case
- Mounting: magnets or screws
- Coverage up to 1000 m

ADM35 is used to monitor temperature, illumination and presence of magnetic field

ADM35H is used to monitor humidity, temperature, illumination and presence of magnetic field

INDOOR & OUTDOOR NAVIGATION

ADM P50

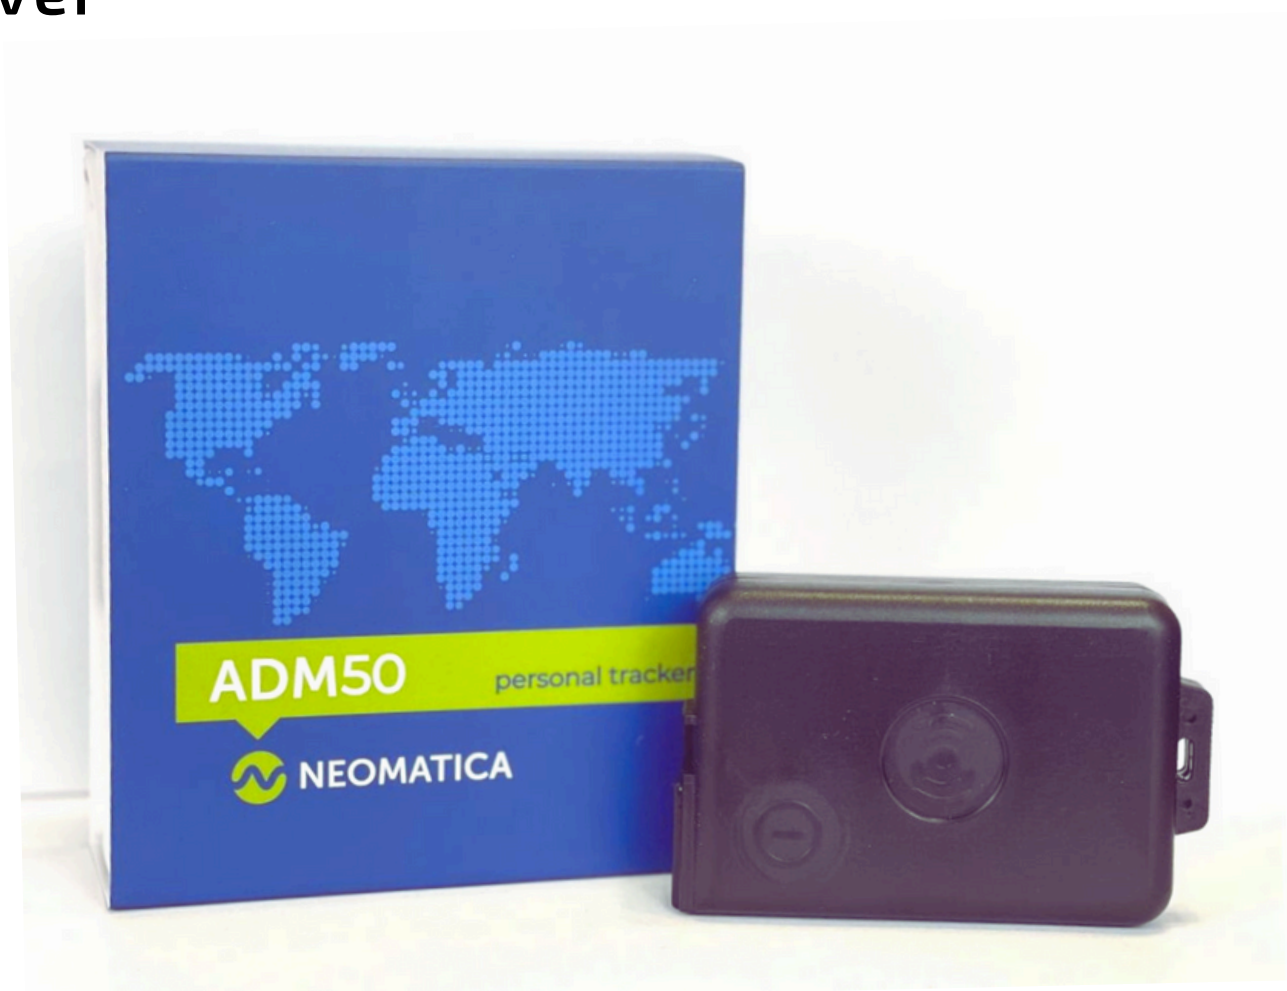

Sphere of application

- Children and elder people
- Security console
- Personal car
- Logistics
- Taxi
- Employees
- Aircraft
- Portative beehive

BEACON ADM M50

- Autonomous work for up to 1 year
- Flexible configuration of energy saving modes
- Rechargable battery
- Receiving of coordinates via SMS or SMS + Server

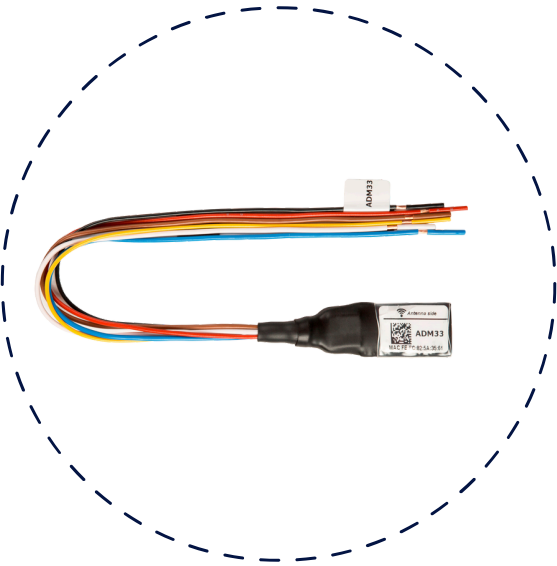

VEHICLE SECURITY

Security complex **TRACKERS+IMMOBILIZER+TAG**
provides reliable protection of the car
